ABOUT DR. SANTANA-CASTELLON

Dr. Santana-Castellón is a wildlife biologist at the University of Guadalajara (PhD Univ. of Wisconsin-Madison). He has worked for 35 years in bird monitoring and conservation in Mexico, USA, Central America and the Caribbean, and in creating conservation institutions such as the Sierra de Manantlán Biosphere Reserve, the Ayuquila River intermunicipal watershed governance mechanism, the UNU Western Jalisco RCE, and most recently, the Museum of Environmental Sciences.

He has served on the governing boards of the Society for Conservation Biology, the Association for Tropical Biology and Conservation, and the Cornell Laboratory of Ornithology. He has published over 100 articles and book chapters for technical and general public and has directed over 50 undergraduate and graduate thesis. For their work in western Mexico, he and his colleagues have received numerous national and international awards and recognitions.
